DETAILED ACTION

This office action is in response to the communication, received 11/3/03, in which applicant amended claims 3-6, 8-10, 13-15, and 18; and added new claims 20-22.

Claims 1-22 are pending.

Claim Rejections - 35 USC § 112

Claims 1-19 stand rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Applicant's arguments were carefully considered but were not found persuasive.

Applicant contends that the prior art cited by the examiner (Dermer , Biotechnology, 1994, vol. 12, page 320) is taken out of its proper context, resulting in an overly broad generalization. Applicant further contends that the prior art reference has little relevance regarding the issue of enablement of the claimed invention. The applied reference states that tumor cell lines do not mimic conditions in the human body. Applicant points out that Voskoglou-Nomikos et al. (Voskoglou-Nomikos, Clin Cancer Res. 9(11) :4227-4239, 2003) recently verified that the *in vitro* human cell line model was predictive of Phase II clinical trial performance of cancer drugs. The examiner contends that the aforementioned reference states that the *in vitro* cell line model was predictive for non-small cell lung cancer under the disease

oriented approach, for breast and ovarian cancers under the compound-oriented approach, and for all four tumor types together (see abstract). The Voskoglou-Nomikos reference does not mention myeloma or multiple myeloma, the cancer of interest in the instant invention.

New Rejection

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3, 5, 8, 10, 13, 15, and 20-22 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The aforementioned claims recite SEQ ID NO:5, a sequence that was not described in the instant application.

Conclusion

All claims are rejected.

Art Unit: 1654

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
